Your friend,

K
 4-4 2-4

To decode the message and find out who sent it, fill in the blanks. The numbers under each blank tell you 1) which frog to choose, and 2) which letter in that frog's name belongs in the blank. So 1-5 is "F," the fifth letter in the name of the number 1 frog, **BULL FROG**.

2. LEOPARD FROG

3. WOOD FROG

1. BULL FROG

5. GREEN FROG

4. SPRING PEEPER

Keep track of how many frogs you see or hear on your park visit.

FROG ALERT Frogs are sensitive to pollution and other stresses in their habitats, so scientists monitor them as a way of tracking the health of the planet. Right now, the number of frogs is decreasing which may be telling us that their habitats are in trouble.

ANSWER:
 Dear Friend,
 FOLLOW THE TIPS ON THIS WEBSITE TO
 HELP STOP RAPID CLIMATE CHANGE.
 THANKS FOR HELPING MAKE THE PLANET
 A HEALTHY HOME FOR ALL LIVING THINGS.
 Your friend, KIP
